12. If the English language was a problem, how to improve?	<ul style="list-style-type: none"> - More oral practice - Listen to music - Communicate with other students - Nothing to improve - Make sure that everyone has a basic English understanding - Talk to my new friends - Watch movies, listen to music, talk to students of other nationalities - Sign language - Make games and challenges - If English is a problem, you need to watch more tv series, more than what you use to, to study, and even if you still don't understand English, you should try to understand what the others are talking about and focus on words. That's my opinion. - Sign language - More oral practice - Study more English - Speaking - Watch English films and talk to friends from other countries - More oral practice and study vocabulary - Make games or challenges for the students to interact - I think that only people with medium level of English should participate - The students were at way different levels which made it hard to cooperate - More oral practice - Let the students try, instead of translating everything to them. And let us sit with people we don't know to improve the speaking - Challenge the students by placing them with people that don't speak their language - Investing more in English at school - Having an English class at school.
